

Line Lube

Technical Datasheet

1. Description

Line Lube is used to lubricate concrete lines, hoses and pumps

2. Typical Application

- All types of wet sprayed concrete applications
- Pumped concrete
- Slick Lines
- Replacement for cement slurry

3. Properties

Property	Value
Nature	Powder
PH in 1% Solution	7.9 - 8.5
Colour	White
Chemical Base	In-organic Salts

3. Packaging

Containers	227g Packets
------------	--------------

4. Directions for Use

- Use approximately 100 to 500 liters of water per 1 kilogram of Line Lube.
- Line Lube can be premixed for pipelines or mixed in the concrete pump hopper by reversing the pump for a few strokes.
- When mixed in the concrete pump use approximately 20 – 30 liters of water to 200 grams of powder.

5. Safety and Storage

Always wear full PPE when using the product. For further information refer to MSDS or contact your local RSS Mining Representative. V-Seal is classified as harmless. RSS Mining (Pty) Ltd will provide onsite assistance when requested.
