

Concrete Remover

Technical Datasheet

1. Description

Concrete Remover can be used anywhere you find concrete, cement or mortar. It destroys the binder of these materials, making them easy to remove from surfaces by brushing them off.

2. Properties

Property	Value
Nature	Liquid @ 25°C
Specific Gravity @ 20°C	>1 kg/m ³
Colour	Translucent
pH	1.5 (± 0.3)

3. Packaging

Containers	25l non-returnable container 200l non-returnable container Bulk tanker loads
------------	--

4. Directions for Use

Applications

- Depending on the severity of the concrete buildup Concrete Stripper can be diluted to a maximum of 1:4 (one part Concrete Stripper/ four parts water).
- Apply Concrete Stripper by either spraying or brushing onto the surface of the concrete build up.
- Agitate the concrete build up with a brush for several minutes and then rinse. Repeat the process if required.
- You can leave the Concrete Stripper on the concrete buildup for several minutes or overnight, depending on the severity of the product.

Can be used to clean:

- Steel or plastic moulds
- Readymix concrete vehicles
- Mixer drums
- Concrete pumps
- Cement silos
- Cement scales

5. Safety and Storage

Always wear full PPE when using the product. For further information refer to MSDS or contact your local RSS Mining Representative.

If in the original sealed packaging, Concrete Stripper has a shelf life of up to 12 months from the date of manufacturing.
